Flutter Denver

Monthly Event 01/07

Co-ordinators

Michael Jordan, Rona Kilmer, Bert Beckmann

AGENDA

Flutter Denver Meetup Group Update

1. Give a quick update on the status of the Meetup group.

Icebreaker Exercise

- Quick 6 minute icebreaker exercise to encourage attendees to meet their fellow members.
  - Talk with 3 people you don't know.
    - Get their name.
    - Find out one cool thing Flutter related they've learned in the last 3 months.
    - Find out one thing Flutter related they're anxious to learn in the next 3 months.
- Group share of what everyone found out about each other.

Brainstorming Session

- Use the information from the icebreaker activity to build a list of things people have learned and things people want to investigate more.
- Discuss how Flutter Denver Meetup events can be productive.
  - Discuss expectations for Meetup events.
  - Discuss group participation.
  - Some ideas:
    - More time to socialize and mingle with other members.
    - Have short "show-n-tell" sessions,

- Everyone should be able to share one cool or interesting thing they've learned or read since the last Meetup event.
  - Presentations on topics of interest.
    - Ex. performance tools, Test Driven Development (TDD), Dart Analyzer / Linter, Web Hosting a Flutter Web app, etc.

NOTES

Key points from last brainstorming session on what members would like to get out of participating in the Flutter Denver Meetup group in 2020:

- An Active Community of Flutter Colleagues
- A Network of Kindred Spirits Working to Share Ideas and Experiences Working with Flutter
- Workshops that Allow Both Experienced and New Flutter Users to Learn and Build Together
- Presentations of Flutter Related Concepts and Technology
- Combine Workshops with Presentations to Help Build Skills

Here's a list of the other learned or like to learn topics:

- Progress Indicator Behavior with New iOS Dark Mode
- State Management: BLoC, Provider, Stateful, React
- Notifications
- Firebase Analytics
- Rive (Flare) Animation
- Flutter Architecture
- Testing
- Test Driven Development (TDD)

ACTION ITEMS

1. Scott Derhak and Rona Kilmer are going to investigate using Slack as a collaboration hub for the Flutter Denver group.
2. Michael Jordan is going to investigate solutions for a central repository for Flutter Denver content (ex. presentations, code, etc.), most likely using GitHub open source.

3. Jonah Walker will prepare a presentation on state management in Flutter to present at the February Meetup event.

FEBRUARY MEETUP EVENT AGENDA

Agenda for February 4, 2020 Flutter Denver Meetup
- Welcome
- Show-n-Tell
    - Members Sharing Current News and Experiences
    - Updates on Slack and GitHub Repository
- Presentation: State Management - Jonah Walker
- Set Objectives for March Meetup Event
