*Reddiyo supports Android and iOS devices. You will also need a Garmin or
Polar heart rate monitor and/or power meter to get the most out of Reddiyo.*

No more generic one size fits all training plans.

At Reddiyo, we believe you shouldn't have to be a pro to get
customized plans and you shouldn't need a degree in advanced
statistics to understand your training data.

Reddiyo takes the complexity out of training by providing
cycling plans that help you achieve your goals.
